■ SUMMARY

Senior Software Engineer and Technical Lead with 10+ years of experience across mobile and enterprise software development. Strong background in C#, .NET, Microsoft SQL Server, and T-SQL, combined with 4+ years of building and delivering production Flutter applications. Currently leading mobile application development with responsibility for technical direction, architecture, CI/CD, and reliable product delivery. Hands-on experience across enterprise systems, mobile applications, BLE integrations, and regulated digital health products.

■ PROFESSIONAL EXPERIENCE

Healy World

Berlin, Germany

Team Lead Flutter Engineer

Oct 2023 – Present

- Built and maintained multiple Flutter mobile apps in production, ensuring stability and reliable delivery.
- Led a team of four developers to deliver mobile apps, driving technical standards and resolving complex issues to maintain engineering quality.
- Implemented product requirements and drove feature delivery, supporting planning and estimation to ensure smooth releases.
- Introduced a scalable, modular mono-repo architecture with melos-managed internal packages, enabling shared components across multiple apps, parallel development, and streamlined dependency management.
- Proactively monitored platform and cloud dependencies (Android, iOS, Google Cloud, Firebase), identifying risks early and mitigating delivery blockers.
- Collaborated closely with product managers, QA, and backend teams to align technical strategy with business needs.
- Improved engineering throughput and reliability by introducing CI/CD automation (Git hooks, GitLab CI, Bitrise) and Jira API-driven workflows.

Senior Flutter Engineer

Dec 2021 – Sep 2023

- Developed and delivered production Flutter mobile apps for wellness and wearable use cases, used by 100k+ users globally.
- Implemented SSO authentication using OAuth 2.0 and OpenID Connect.
- Built BLE-based communication layers to support reliable wearable device integration.

Skills: Flutter, Dart, BLoC, GitLab, Firebase, Bluetooth (BLE), SQLite, Bitrise, Jira, Confluence, TypeScript, Postman

NeuroNation

Berlin, Germany

Xamarin Engineer

Aug 2019 – Nov 2021

- Developed and delivered Xamarin-based mobile brain training game apps for Android and iOS, used by 20M+ global users.
- Improved app stability, achieving crash-free rates of 99.8% on Android and 99.7% on iOS.
- Integrated third-party libraries and implemented native features to enhance app functionality and performance.
- Worked within a Scrum-based development process, participating in sprint planning, estimation, and retrospectives.
- Contributed to the launch of a CE-certified, regulated digital medical application (DiGA), NeuroNation MED.

Skills: Xamarin, C#, .NET, Java, Objective-C, SQLite, SQL, Firebase, Jenkins, GitHub

MindTags

Berlin, Germany

Xamarin Engineer

Jan 2018 – Jul 2019

- Developed a location- and proximity-based Xamarin Android app featuring indoor navigation, beacons, text-to-speech, and GPS, designed to support accessibility use cases.
- Developed a Xamarin Android app, implementing customized Mapbox navigation and GPS-based routing features for guided running use cases.

Skills: Xamarin, C#, .NET, Java, Realm, Bluetooth (BLE), Mapbox, Bitbucket, Azure

Forever21

Seoul, South Korea

Senior .NET Engineer

Jan 2017 – Oct 2017

- Developed and delivered in-house merchandising and supply chain management (SCM) systems implemented as .NET desktop applications.
- Developed and optimized T-SQL queries for .NET applications using Microsoft SQL Server, including performance tuning of complex queries.
- Developed an internal store intranet web application using ASP.NET MVC 5, Bootstrap, and jQuery.

Skills: C#, .NET, [VB.NET](#), Microsoft SQL Server, T-SQL, ASP.NET MVC, WinForms (MVP), VB6, jQuery, AJAX, JSON, Bootstrap, Crystal Reports

Freelancer

Seoul, South Korea

Senior Software Engineer (.NET / Java)

Jan 2011 – Dec 2016

- Delivered enterprise software solutions across finance, retail, construction, aviation, and public sectors using C#/.NET, ASP.NET WebForms, Java, and relational databases including Microsoft SQL Server and Oracle.
- Built and maintained database-driven business applications across ERP, finance, supply chain, and internal management systems.

Skills: C#, .NET, ASP.NET WebForms, Java, Microsoft SQL Server, Oracle Database, Sybase

Forever21

Software Engineer

Seoul, South Korea

Mar 2008 – Oct 2010

Software Engineer Intern

Los Angeles, USA

Sep 2006 – Feb 2008

- Developed and maintained merchandising and SCM systems using Visual Basic and Microsoft SQL Server.

Skills: Visual Basic 6, C#, .NET, VB.NET, Microsoft SQL Server, Crystal Reports

■ EDUCATION

Bachelor's in Software Engineering, Dong-Eui University, Feb 2008

Busan, South Korea
